

PIRS – Highlights and Improvements

Release 2025.10

New button to switch quickly from edit to read mode

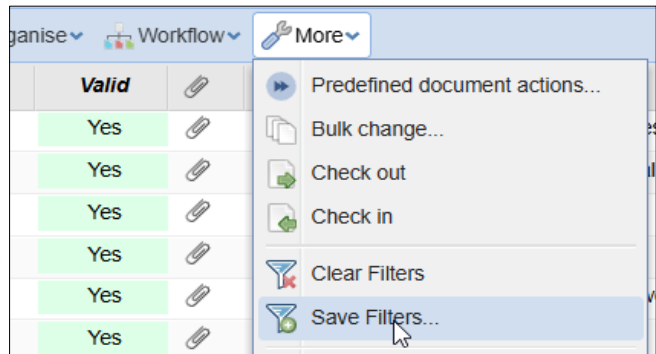

The screenshot shows the SOBIS interface for editing a document. The top navigation bar includes tabs for 'Dashboard', '1.00 Correspondence', and 'Draft E-Mail - SOB/SOB/00015 AnCo2'. Below the navigation bar, there are buttons for 'Save', 'Close', 'New Correspondence', 'Distribution List', and 'Organise'. The 'Close' button has a dropdown menu open, showing two options: 'Close' and 'Close and switch to read mode'. The 'Close and switch to read mode' option is highlighted with a green border. Below the dropdown, there are form fields for 'Title*', 'Doc Num', 'Valid:' (with radio buttons for 'Yes' and 'No'), and 'Status*' (with a dropdown menu showing '10. Draft'). At the bottom, there are tabs for 'Attachments (1)', 'Details', 'Customer & Supplier', 'Remarks', 'Workflow', and 'Revision'. The 'Attachments (1)' tab is active, showing a list of attachments with 'Add' and 'Delete' buttons. One attachment is listed: 'AR5GG+01000A01.pdf (30,20 KB)'.

A new option of the Close button allows you to switch quickly from edit to read mode.

This keeps document on your focus, if required.

Persist column order in Saved Filter

Saved filter have a new option to persist the column order.
In addition a new field shows the type of the filtered data.
