

PIRS – Highlights and Improvements

Release 2025.11

Allow flatten of signature and stamps

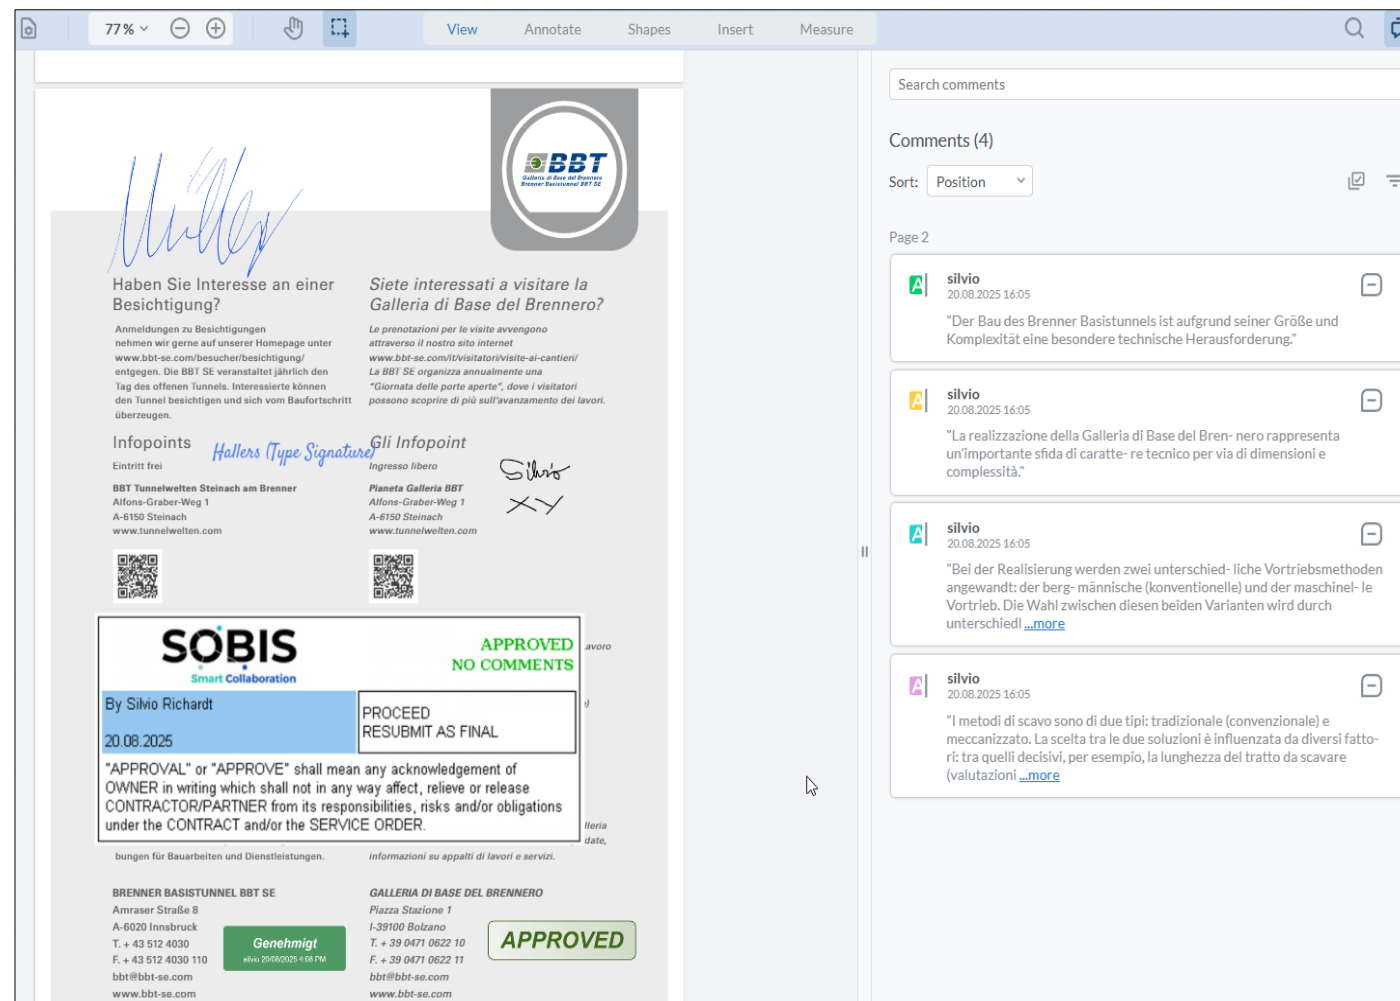

New option that allows flattening for signature and stamps only.

In the example you see signatures and stamps as part of the pdf („flattened“). Other annotations are still shown as Comments.

Flattening is triggered when user:

- Download annotated pdf
- Create and re-attach pdf

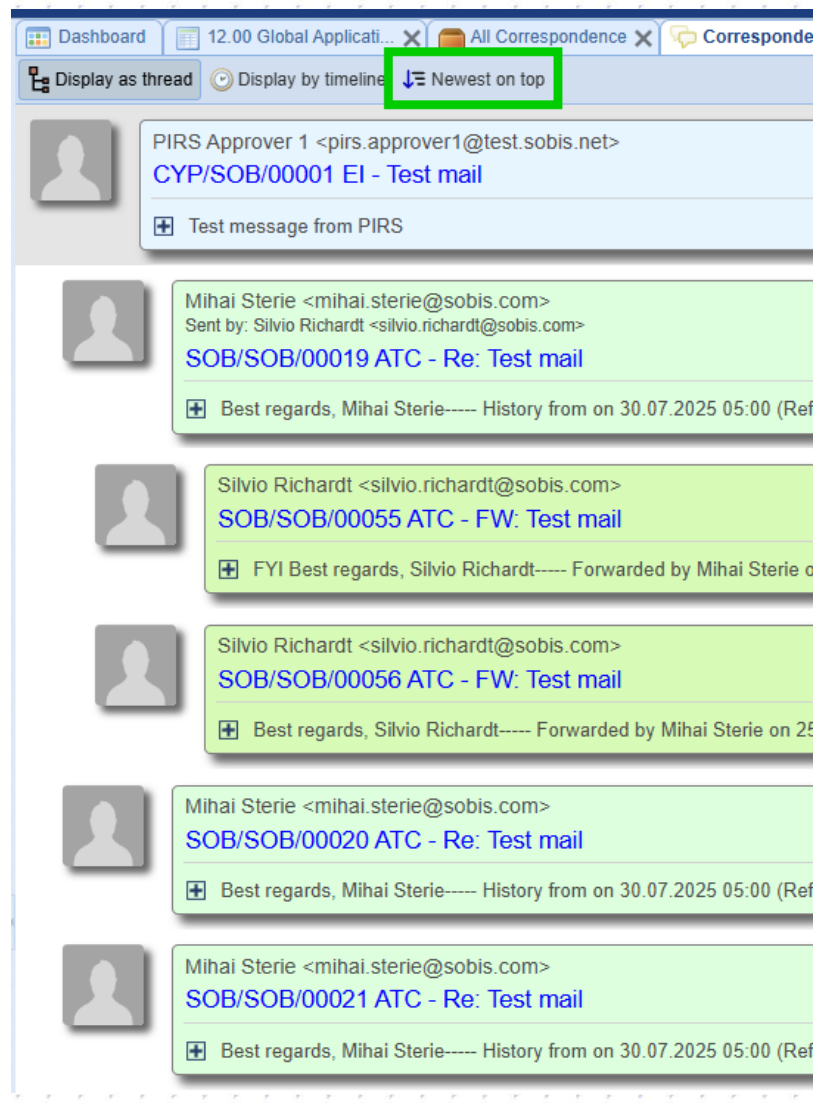

Please talk to SOBIS to enable the feature in your environment.

Correspondence Thread: Display by timeline - Option to change the order

Implementation of new buttons to change the order of the correspondence thread entries

User can decide if he would like to see the newest or older on top

Dashboard | 12.00 Global Applicati... | All Correspondence | Correspondence

Display as thread | Display by timeline | **Newest on top**
