

PIRS – Highlights and Improvements

Release 2025.13

New View & Widget "My Approval Forecast" on project level

Users often want to see the workflow task they will be involved in over the next few days/weeks
Therefore, we've provided a new view and widget for displaying the "My Approval Forecast" on project level

The View contains the following documents / events where:

- the Workflow has been started, and the current user is not the current assignee, but will be included in one of the next steps

My approval forecast						
Distribution List Workflow More

Revise PIRS Reply Concept

Revise Reply Concept within PIRS to use the Reply to header of Correspondences

Example Mail:

From: project@sobis.com
Sender: max.mustermann@sobis.com
Reply-To: max.mustermann@sobis.com, training.project@sobis.com

Recipients in PIRS after clicking Reply / Reply to all:

Action	Till 2025.12.X	Starting with 2025.13.X
Reply	project@sobis.com	project@sobis.com, training.project@sobis.com
Reply to all	project@sobis.com + Recipients from CC / DocLink	project@sobis.com training.project@sobis.com + Recipients from CC / DocLink

Revise full-text index logic

In one of the last releases, we updated the full-text indexing logic to enable „snowball“ searching for body / remark fields. This often resulted in users not receiving the expected results when searching.

Based on that we decided to change the existing logic again.

Example: Save a correspondence with the word „claims“ in the body

Search term in full-text search	Till 2025.12.X	Starting with 2025.13.X
Claims	No result found	Result found
Claim*	Result found	Result found

PIRS:Event App - TinyMCE integration & UI Optimizations

Implementation of TinyMCE to improve usability and enable rich text formatting.

We've decided to keep this as simple as possible for now and only provide a few key formatting options.

In addition, we have introduced a new bottom navigator for easier navigation in event edit mode

Create New Event

Description

↶ ↷ Paragraph B I ≡ ≡ ≡ ≡ < >

On **August 28, 2025**, the expected delivery of **high-pressure piping components** from Supplier did not arrive on site as scheduled under the **agreed delivery date of August 15, 2025**. The materials in question are essential for completing the pipe rack installation in Area B, which is on the project's critical path.

Despite multiple written follow-ups (see attached correspondence dated August 10, 17, and 24), the supplier failed to provide the required components until September 20, 2025—resulting in a **36-day delay**. As a direct consequence:

- Mechanical completion in Area B was delayed.
- Commissioning activities had to be rescheduled, impacting downstream disciplines.
- The project faced additional labor and equipment standby costs.

Impact Summary:

- Delay to mechanical completion: 5 weeks
- Estimated additional cost incurred: €62,000
- Risk of client-imposed LDs (Liquidated Damages):
